Trying to decide whether you want to teach primary or secondary? Need some experience? Before you apply for any route into teaching, it would be a good idea to get some experience in a mainstream state school under your belt.

What will a day look like?

A typical day with us will include an introduction to our Training Director. An outline of the various options available through our Partnership, with free advice and guidance. A tour of the school, with students. A timetable of lessons to observe and structured guidance on how to achieve the most out of your experience. Full immersion in the subject and department of your choice. Opportunity to reflect on your experience and to network with existing trainees, former trainees and mentors over lunch.
