

Teacher Subject Specialism Training (TSST)

Overview

As part of the family of CAT schools you can benefit from this DfE funded and accredited training to support the improvement of subject knowledge in Secondary Maths, Core Maths, Physics and Maths Mastery for transition from primary to secondary. The Core Maths is suitable for GCE Science, Psychology and Geography teachers, the programme can be personalized to meet the mathematical content of these specifications.

Objectives

The programme:

- improves subject knowledge
- provides pedagogy-based training
- develops teacher confidence

Facilitators

Delivered by Specialist Leaders of Education

Audience

Existing Teachers with QTS already teaching or would like to be able to teach these subjects in any of the following categories:

- Non-Subject Specialist Teacher whose initial training was not in Maths, Core Maths, or Physics and who find themselves spending a considerable time teaching these subjects or would like to simply improve their knowledge for enrichment purposes.
- NQTs
- Unqualified Teachers employed by an Academy
- Ex-teachers who want to return to the teaching profession
- Primary Maths Teachers requiring Maths Mastery subject knowledge to aid in KS2-KS3 transition.

Commitment

Programme length varies depending on subject and are run as Twilights or as full days.
